You will find that in the long run it pays to wear good shoe leather.

We proceed upon the theory that the best is cheapest, more, perhaps, in shoes than in most things. Also that men usually want to duplicate and keep duplicating a successful shoe. Hence we carry the same makes and grades from year to year in full assortment of sizes. And we make quality rather than price the basis of acceptability. Take, for instance, our \$5 shoe.

Plenty of five-dollar shoes in all the shoe stores. But ours are considered peculiarly good, and we'll tell you why. All are by one maker. We buy nothing else from him; because this is the one thing he can make best. Good at the start, we kept adding improvements, never once asking a lower cost because of the quantity consumed. Now, after years of trial, sending out thousands of pairs with our fullest guarantee, we pronounce these shoes the best value to be got anywhere for a fivedollar note. So will you, after a trial. All shapes, all sizes-button, lace,

congress and Waukenphast.

Our illustration suggests trousers as well as shoes. You know, or rather you should know, we are closing out our broken and small lots of men's trousers at \$3.83 for all formerly \$6 and below, and \$5.53 for all formerly \$6.50, \$7, \$8 and \$9.
